**"Relax And Let The
BL-40 Series Do
All The Work!"**

BL-40 & BL-40TC Spa Controls

BL-S Spa-Side Control Panel

BL-M In-House Control Panel

The BL-40 Series Spa Control Systems utilize proven electronic technology to integrate all spa functions into one efficient spa system. They operate either 2-single speed pumps or 1-dual speed pump and provide total system activation, allowing control of the spa from spa-side or in-house control panel.

SPECIAL FEATURES

- Individual control of Jets, Spa light, Spa Water Temperature, System On/Off and Air Blower or other accessory.
- U.L. listed weatherproof spa-side control panels with LED status indicator lights to safely and efficiently confirm operation of the system.
- Freeze protection circuits activates the circulation and/or jet pump.
- Convenience of temperature control from spa-side or from the comfort of your home.
- 30 minute automatic safety shut-off of jets and accessory functions.
- 4 hour safety shut-off of spa light and pool light.
- Automatic maintenance cycle activates each time the spa is switched off. A 30 minute "Extended Filtration Cycle" automatically filters the water and cools the heater.
- Heater Protection turns heater Off and the pump will continue to operate for 2-3 minutes when the system is deactivated.
- Virtually no distance limitations between the equipment and the spa. The interconnecting cable is available in 25ft, 50ft and 125ft lengths.

"The BL-40 Series Control Systems Offer the Utmost in Operating Convenience"

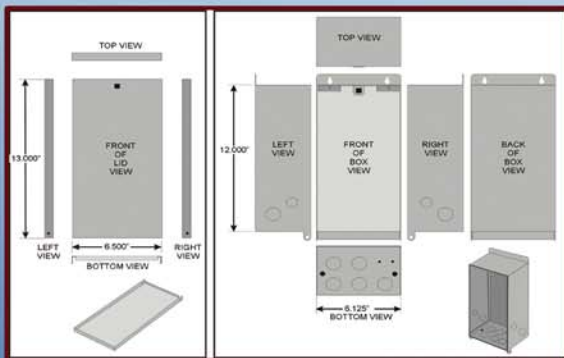

BL-S (Standard) Spa-Side Control Panel

Proven Performance and Contemporary Design

- Installed at spa-side or in-house
- Allows you to set spa water temperature, jets blower and light.
